Summary

I am a Developer based in the Philippines. I really enjoy solving problems as well as making things pretty and easy to use. I can't stop learning new things; the more, the better. For the front-end I usually work with Javascript, either standalone or including popular frameworks like ReactJS and VueJS. I also make the web pretty by using Sass, CSS and, whenever needed, any of their friends: Bootstrap, Bulma, etc. For the back-end I also work with Javascript (NodeJS, Express, MongoDB, etc). But, of course, whenever the project requires PHP, I do PHP as well (Wordpress, Laravel, etc). I feel comfortable working with many Adobe products. Photoshop, Illustrator, InDesign, Lightroom or Xd are some kind of industry standards and I love working with them. I'm not limited to them, though: Gimp, Inkscape or Figma are also very valid applications that I've been working with. User interfaces, brochures, books, branding... You name it! As I mentioned, creating pretty things is particularly important for me.

Experience

Chief Executive Officer
Otakunity, Inc.
Jun 2016 - Present (5 years +)
The Otakunity seeks to provide the observable and indispensable needs of Otakus and other users. It is developed by a team joined to create a community where Otakus are unified and are connected. We have been developing and improving the social networking site to offer the power in sharing stuffs they love. We are making the best atmosphere available for the users. There would be giveaways for the users who gathered large number of points. Otakunity will allow users to simultaneously post, chat, and watch.
